

Don't compromise, customise

Today's questionnaire tools make users choose between compliance and flexibility, our tool lets you do both.

It allows teams to align their data with major frameworks while also adapting questionnaires to their workflow, region, or goals. It is a modern alternative to outdated questionnaire tools, flexible yet connected.

The 3 C's of QB-EDGE

Collaboration

- Real-time comments and structured review workflows
- Status tracking (draft, submitted, approved, etc.)
- Audit log for traceability
- Attach documents/images for evidence

Customization

- Build questionnaires from scratch or reusable templates
- Variety of question types (text, number, rating, image, etc.)
- Template versioning, usage tracking, icon selection
- Designed for flexible and scalable use across teams

Compliance

- Supports CSRD, SFDR, ISSB, and GRI frameworks
- Reduces manual effort in meeting compliance requirements
- Built in accordance with GDPR and FADP
