

# Smart utilities, smarter decisions.

Turn utility billing into actionable insights

## AI-powered cost & consumption analytics

GIG UtilityIQ brings all your electricity, water, gas, and other utility billing data into one central, intuitive dashboard. No more manual spreadsheet wrangling – our AI-powered solution automatically extracts, standardises, and analyses your data to help you control costs, optimise consumption, and detect anomalies before they impact your bottom line.

## Built on cutting-edge AI

Using advanced machine learning from Microsoft AI, GIG UtilityIQ goes beyond simple OCR. It accurately extracts text, key-value pairs, tables, and complex structures from invoices and utility statements, even when formats vary between providers. This automation eliminates repetitive data entry and ensures reliable, high-quality data for analysis.

## Incorporate UtilityIQ into your workflow

### Solve the pain points that slow you down

- Centralize all energy data in one place.
- Automate extraction for accuracy.
- Save time with built-in conversions.
- Spot anomalies with AI analytics.
- Compare fairly with normalized metrics.

### Smarter decisions, faster

- Benchmark performance across sites.
- Forecast consumption and costs.
- Prioritize key efficiency measures.
- Export reports instantly for compliance or review.

### Designed for real-world operations

- View clear 12-month billing trends.
- Compare current vs. past periods.
- Drill down by utility, location, or provider.
- Store invoices and supporting documents.
